#### Correction :

- Form of equipment redundant during the creation of an intervention from a empty database
- Direct bond tools and instructions imported only the description and not the wording
- Field "quantity of person" , in the operating range displayed always zero
- In the purchase request, during the addition of a new supplier from a part without them, the selection was tiresome.
- In the intervention, calculation of total time didn't work durind the suppression of a resource.
- Right of users in the purchase request wasn't totally correct
- Right of users system and statistic wasn't completely defined
- Calculation of total costs in the intervention form wasn't correct
